

PLASTICABLE

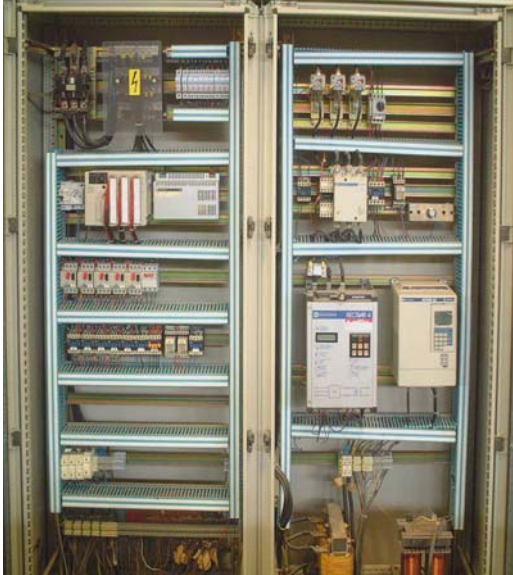

Located in the Yopougon industrial zone in Abidjan, Republic of Côte d'Ivoire, this factory produces domestic and industrial electric unipolar and tetra polar cables (up to 300 mm²).

Producing of iso grey, iso red and ringed tubes

Cable layer (toronneuse): 6 to 70mm²
capacity 140m/mn

Isolation: From 1,5 to 16mm²
capacity 1200m/mn

← Partial views of the 2 facilities

Cable layer configuration

Box with 2 modules of 2000 x 8000 x 400 containing:

1 TSX 37 with 90 e/S TOR automation linked to a XBT Magelis display

7 motor starts of which 2 under variator ATV 66 and numeric Rectivar RTV 84

← View of automaton 37 and numeric variators cable layer line

Isolation line configuration

Automatic and electro-magnetic frame composed of :
1 TSX37 automaton with analog 192E/S TOR and 20E/S

5 motor starts under RTV 84 and RT04 numeric variators
(extruder, drawing, double-coil-related automatic reels...)
